

Kim A. Soladine

the Scissor Case

with the **Basic '7' Plus 2**

The Scissor Case project is one of the best ideas that has happened in a very long time. Created, designed, and developed by Kim Soladine, this workshop will lead you thru this enjoyable project from transfer of pattern to assembly.

This single project can be used to help your guilds activity for a unified project and to help build interest with beginners and new members. The possibilities are numbered by only your imagination.

Scissor Case - Class - 1 Full Day Cost: \$85.00

Friday, Oct., 12th @ 8: am - 12: noon & 1: pm - 4: pm

What one item requires so little material, makes a great 4H or useful beginner project that every seasoned leatherworker will make time and time again, be a valued addition to any home, find continued use year after year, and be well received by a man and / or woman.

What person doesn't have at least one or two pairs of scissors, garden shears, or fishing pliers, and owns a leather case to protect them?

In this class, Leatherworker Kim A. Soladine takes a different approach at stamping, and carving Traditional and Landscape designs. Using only the Basic 7 tools, plus 2 of Kim's favorite tools that most every experienced or beginner leatherworker should have among their collection of tools, you will start with methods of tempering leather, ending with finishing and hand stitching.

If time allows, Kim will demonstrate his full color painting style using little more than the three primary colors. Kim brings to the class his 30 plus years experience as a Designer / Artist in Visual Communications and hopes each participant leaves with more than the knowledge of how to make and decorate a scissor case.

This class is the 'Cutting Edge' of "Experience Leather with Kim."

Students need to bring:

Stylus to transfer pattern
Mallet or Maul
Stone
Leather shears (super shears)

**the Basic '7' Tool set,
Leather & additional
supplies, and other
needed tools are
provided.**
